

Premium Bunker Sand

Product Description

Shaw Resources white **Premium Bunker Sand** is a fine grain of hard quartz silica that is resistant to movements and wind offering excellent playability and drainage.

Made from washed silica sand, this product will enhance your golf course and ensure there are no drainage issues.

With over 25 years of experience in the golf industry, we have technical expertise in both standard and custom golf course aggregate materials. Our ongoing research efforts and activity within the golf community as part of both the Atlantic Golf Superintendents Association, and the Atlantic Turf Grass Research Foundation, ensure that we are at the forefront of product knowledge and development.

Technical Data

Gradation:				
Sieve (mm)	PP Low (%)	PP High (%)	Ret Low (%)	Ret High (%)
