

## Product Description

Shaw Resources **USGA Sand** is a natural fine brown sand that is washed and dried with a top screen of less than 2 mm, and produced to USGA particle size distribution guidelines.

With over 25 years of experience in the golf industry, we have technical expertise in both standard and custom golf course aggregate materials. Our ongoing research efforts and activity within the golf community as part of both Atlantic Golf Superintendents Associations, and the Atlantic Turf Grass Research Foundation, ensure that we are at the forefront of product knowledge and development.

Our USGA Sand's particle size is ideal for drainage after rain, and will not blow away, ensuring optimum performance.

## Technical Data

Gradation:				
Sieve (mm)	PP Low (%)	PP High (%)	Ret Low (%)	Ret High (%)
3.35 (No. 6)	100.0	100.0	0	0
2 (No. 10)	99.0	100.0	0	1
1 (No. 18)	91.0	96.0	4	8
0.5 (No. 35)	51.0	62.0	34	40
0.25 (No. 60)	12.0	20.0	39	42
0.15 (No.100)	4.0	7.0	8	13
0.075 (No. 200)	0.0	0.0	4	6
Pan	0.0	0	0	1

### Notes:

PP = percent passing RET = individual percent retained

## Product Packaging

USGA Sand is available in bulk and in 25k bags.

Product	Stock Code	Weight	Shipping
USGA Sand/Peat Blend (20%)	8651K	Bulk/Loose	Bulk /Loose
USGA Sand (Bulk Bags)	8889M	Bulk Bag	1 Bag/Pallet
USGA Sand	8905	25KG	56 Bags/Pallet
